

PRESS RELEASE

IBC launch of the WorldCast Manager's new software redundancy model

The WorldCast Manager NMS/OSS software now offers real-time duplicate data to maximize system uptime

Bordeaux, France, July 24, 2018. - At IBC, WorldCast Connect will be showcasing the latest advancements of the WorldCast Manager, its Enterprise NMS/OSS software serving the broadcast, telecommunication, satellite and cable industries.

The WorldCast Manager is a scalable and multi-faceted platform which centralizes the monitoring and management of all connected devices across one or multiple networks, locally and across multiple locations. It maximizes the uptime and performance of IP-enabled equipment with its set of status alerts, operational tracking, insightful visual reports, and workflow capabilities.

In the dynamic of a disaster recovery scenario, the WorldCast Manager has now been enhanced with a new software redundancy model. This new feature enables redundant solution deployment across multiple independent nodes and real-time data back-up.

"We developed this new feature so our customers benefit from higher system uptime and security; with no time lost on restoring back-ups. A unique advantage of this solution is the extreme simplicity of implementation, possible even onto existing solutions after a simple upgrade to the new version", Mathieu Yerle, Sales Director at WorldCast Connect.

The addition of this new software redundancy model is in line with WorldCast Connect's objective to simplify system maintenance and drive down the Total Cost of Ownership for its customers.

The WorldCast Manager will be showcased at IBC Amsterdam, booth 8.C58, from September 14-18th 2018.

###

ABOUT WORLDCAST CONNECT

Founded in 2017, WorldCast Connect is a software company that designs, develops, and commercializes the WorldCast Manager, an Enterprise Network Monitoring Solution (NMS) and Operation Support System (OSS) providing a user-friendly, centralized and unified interface for the monitoring and management of all connected sites and equipment. Leveraging the 35 years of innovation and deep broadcast industry knowledge it acquired from its sister-company WorldCast Systems, WorldCast Connect extends its reach and product offer to serve the broadcast, telecommunications, satellite, and cable industries. Headquartered in Bordeaux France, WorldCast Connect is a solid team of experts and is growing with a Sales office in the US along with an important distributor network to offer local assistance to its customers across the globe.
