

KYBIO Healthcare

Monitor & Control Your Healthcare ICT Infrastructure

Unified & centralized
umbrella view

Improves productivity
& efficiency

Prevents failures
& critical incidents

Scalable
& fast to deploy

KEY FEATURES

Welcome to a new era of network monitoring & management

KYBIO is a unique software solution centralizing and unifying the monitoring and control of all connected equipment within your digitalized medical institute.

KYBIO is a multifaceted platform designed to help health professionals and building infrastructure managers to efficiently oversee the growing number of IP-connected devices.

KYBIO enables the real-time monitoring of medical devices and infrastructure equipment. It provides alarms, notifications and reports to the appropriate team members and facilitates the detection, follow-up and resolution of incidents. It provides critical information necessary to keep patients safe and your hospital network in optimal operating condition.

Leveraging its powerful auto-discovery feature and its self-configuration engine coupled with a large library of built-in drivers, KYBIO is fast and simple to deploy.

CONNECT supports healthcare professionals with a powerful software solution which enables them to maximize the performance and uptime of their ICT infrastructure at all times.

CENTRALIZED WEB INTERFACE & MOBILE READY

REAL-TIME MONITORING & HISTORY TRACKING

VENDOR-AGNOSTIC MONITORING

ALARM & NOTIFICATION MANAGEMENT

AUTO-DISCOVERY OF EQUIPMENTS

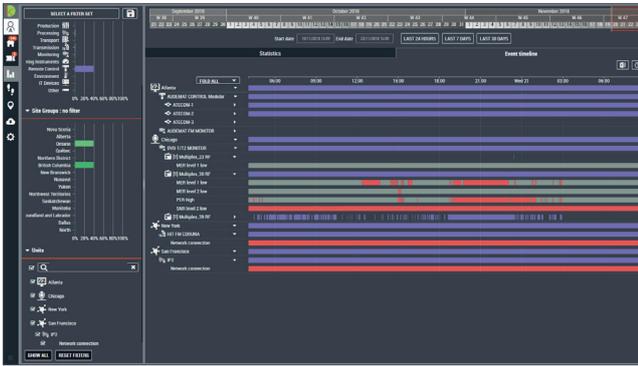

TICKET MANAGEMENT FOR INCIDENT TRACKING

DYNAMIC MAPS AND DISPLAYS

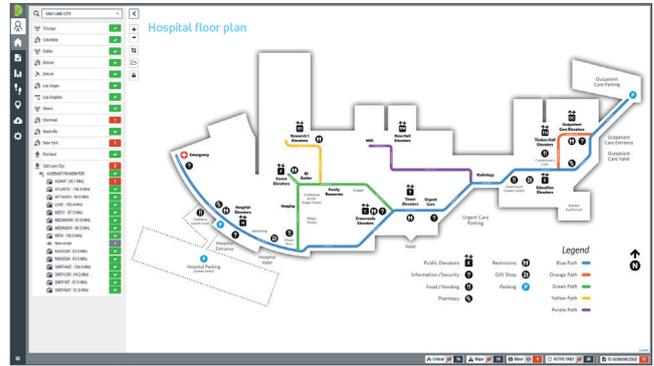

ANALYTICS & REPORTING ENGINE

SIMPLE TO OPERATE

VISUALIZE THE STATUS OF EACH SERVICE AND EQUIPMENT VIA THE DYNAMIC MAP & DIAGRAM

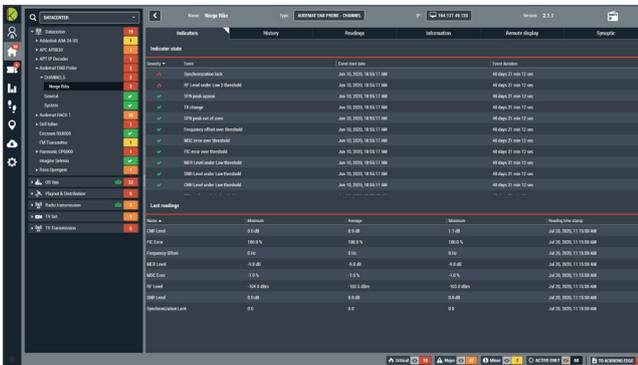

High-level dashboard indicating the status of each service

Diving into a site to explore the status of its equipment

EXPLORE THE REAL-TIME AND HISTORICAL DATA OF ALL EQUIPMENT

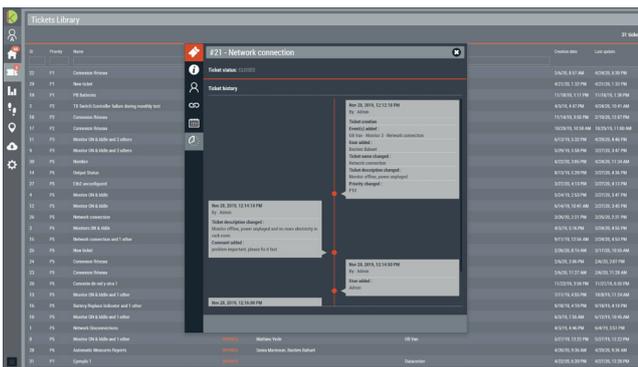

Equipment's key metrics and configuration web-page access

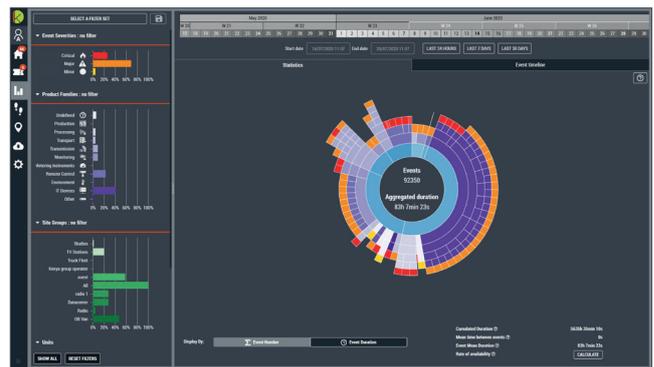

Full details of any alarm or reading

TICKET & INCIDENT TRACKING COUPLED TO A VISUAL REPORTING ENGINE

Track the origin of your events via the Unified Timeline

Build, save & share insightful reports

LARGE DRIVER LIBRARY

OPEN DRIVER POLICY

Can't find the integration driver you need in our existing library? Send us your equipment documentation & let us build the driver for you!

*The driver creation service is complimentary with any support contract for the KYBIO On-Premise solution (perpetual or annual license), and subject to technical feasibility. It remains free of charge with the Premium support contract throughout product operation

SIMPLE TO ADMINISTRATE

Locate and identify your sites

AUTO-CONFIGURATION ENGINE

KYBIO is the easiest monitoring & control software to deploy. Its Auto-Configuration Engine guarantees a very fast startup, within minutes. It fully automates the equipment discovery and provides a fully graphical user interface for the administration of the platform in a few simple clicks.

OPEN IT ARCHITECTURE

KYBIO can be installed on any type of physical and virtual server that matches our specifications. It can be run on-premises, in the cloud or in a hybrid environment.

Supports multiple languages

Chinese - English - French - German - Italian - Japanese - Korean - Portuguese - Spanish

ORDER INFORMATION

KYBIO Media is available as a monthly SaaS, an annual license or a perpetual purchase.

SaaS SOLUTION

(SOFTWARE AS A SERVICE)

Choose from 3 licenses (Starter | Intermediate | Professional) and monitor up to 100 SNMP devices. Platform hosting, administration, and general maintenance are handled directly by CONNECT. Includes drivers from our library and EdgeBot(s).

For more details, visit the Pricing page of our website.

ON-PREMISE SOLUTION

(PERPETUAL OR ANNUAL)

CORE LICENCES

Standard Edition: Up to 25 / 50 / 100 / 250 / 500 / 1000 / 2500 monitored devices. Optional add-ons are available to enable additional functionalities.

Enterprise Edition: Designed for large and complex deployments, beyond 2500 monitored devices. The Enterprise Edition is supplied by default with the redundancy add-on license.

OPTIONAL LICENCES

Redundancy Licence

EdgeBots Licences (25 / 50 / 100 / 250 / 500)
for decentralized deployments

KYBIO API Licence for advanced integrations with 3rd party systems

SUPPORT

Two levels of support contracts are available:

Standard support with hotline during office hours (Mon - Fri, 9am - 5pm) (included in SaaS)

Premium support with a 24/7 hotline & unlimited driver creation service.

Both support levels provide access to all software updates, the driver library, the CONNECT Academy & our CRM/Support Portal.
